ZERO TRUST ASSESSMENT & STRATEGY SERVICE

OVERVIEW

The Zero Trust Assessment & Strategy Service includes:

- Assessment of current **zero trust architecture** and capabilities for all zero trust domains
- Evaluate and assess current **zero trust maturity** based on current security architecture, people, processes, and technology
- Creation of a customized **zero trust strategy**, containing recommendations and proposals for zero trust strategy, maturity, architecture, and journey aligned to business and technical requirements
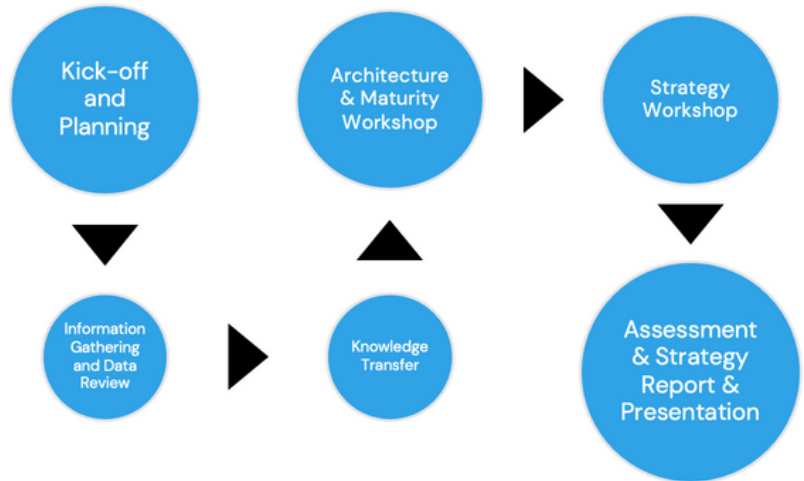

ZERO TRUST DOMAINS COVERED

Users | Devices | Networks | Apps & Data

Visibility & Analytics

Automation & Orchestration

TOP OUTCOMES

- Actionable strategy including a proposed zero trust architecture, journey, and metrics
- Accelerate your zero trust journey with confidence, knowledge, and expertise using a prioritized 3-year technology and implementation roadmap
- Organizational alignment around a future-proof zero trust strategy, architecture, and journey.

OUR APPORACH

Kick-off and Planning → Architecture & Maturity Workshop → Strategy Workshop → Assessment & Strategy Report & Presentation → Knowledge Transfer → Information Gathering and Data Review

ZERO TRUST PRINCIPLES

Remove Implicit Trust   Enforce Risk-Based Least Privilege   Assume Compromise

WHY MODERNCYBER FOR ZERO TRUST SERVICES

ModernCyber has specialized in radically simplifying and accelerating organizations' zero trust adoption. We deliver cybersecurity & zero trust solutions as a part of our lifecycle services (proof of value, assessment, plan, design, implement, optimize) to address the full gambit of people, processes, and technology. We focus on outcomes over marketing and ensure technology journeys are aligned with business strategy.

Our renowned consultants are industry experts and have decades of extensive experience with security and zero trust solutions and hold one or multiple expert level industry certifications.
